

Injection Molding Solution

Intelligent Injection Molding Monitoring Solution

DIAEAP-IMM

The Best IIoT Solution for Machine Tools

- Injection controller data collection
- Real-time production monitoring:
Manufacturing information visualization, Data digitization, Mobile device interface, Remote production management
- Efficient e-Forms: Daily quality daily report, OEE report, Production history, Trend charts, and more
- Optimizes production efficiency: Big data analytics
Parameter optimization, Reduce inefficiency
- Integration of systems:
Integrates different brands of injection molding machines and ERP/MES

Optimizes Manufacturing Efficiency

- Production experience can be recorded and accumulated, improving equipment parameters and manufacturing processes
- Edge computing and real-time analysis of injection molding machine, ensuring quick response, higher installation efficiency
